

Wincor Nixdorf
SlimCash 200 ATM

**Simple for you,
convenient for
your customers**

CASHCARD

The Wincor Nixdorf SlimCash 200 ATM offers an ideal solution for indoor locations with its sleek design and compact size. This ATM can support a range of transaction volumes using a dial up connection.

Easy for your customers to use

With a large colour screen, simple keypad and logical user menus, the SlimCash 200 ensures cardholders can complete transactions quickly and easily. This ATM can enhance the customer experience with features such as the dip hybrid card reader to ensure no cards are captured.

Simple for you to manage

With its sleek and compact design, the indoor SlimCash 200 ATM has been designed to fit into space restricted sites without visually impacting the surrounding premises. A user friendly interface and simple maintenance makes cash replenishment and fault resolution a straightforward task. The new Wincor Nixdorf ATM range also makes downloading the Electronic Journal easier, with the use of a USB stick rather than a floppy disk.

Robust security features

The SlimCash 200 also has the added feature of robust security including:

- A high level UL291 level 1 safe
- A digital combination lock

Supporting your business

A Regional Account Manager will work with you to determine the best cash replenishment option such as self funding or third party cash service, and to ensure the dial up connectivity solution is right for your premises.

Cashcard also provides end to end monitoring services 24 hours a day, 7 days a week, where our helpdesk is available to assist with enquiries and fault resolution.
